

Public Comments (2021 Covid Protocols Survey)

It seems reasonable, however that's only because my kids are fully vaccinated. If they couldn't be vaccinated they probably wouldn't come to school if everyone wasn't wearing masks.

Just let the kids go back to school normal! No masks! Let them eat in the cafeteria together. Let them have a normal school year with activities & field trips. If the kids is sick stay home. Just let the kids be kids & have a good school year. No quarantining or distancing.

I am extremely pleased to see that masks and 3-6 feet of distance are no longer mandated. I have seen first hand the anxiety our children have experienced and are continuing to try to deal with as a result of these mandates and the fear of adults. Thank you Hebron School system for putting the children's needs and best interests first.

I hope they allow for the kids to continue to use their own water bottles even after all of this is over. Drinking fountains are one of my concerns even without covid

Will students have option to ride more than one bus home after school this year? Thank you!

No masks at all. Period.

I pray everyday that these children do not have to wear masks when returning to school. The current plan in place looks like that will be accommodated.
